Extreme innovation

Company Profile

E x t r e m e i n n o v a t i o n

VMC designs and realizes valves and screws for many different types of compressors according to the patented concept of integrating the components: managing a single functional element and assembly speed rather than on several detached elements.

Rather than being just a supplying company, VMC is a true business partner that is distinguished by its enormous flexibility and its great capacity in answering the most varied production needs of each client. VMC knows how to work in co-design, suggesting innovative applicable ideas. Their know-how is born of a profound knowledge of the compressor "system" and of the experience with the valve systems realized and with the correlated technical services.

The principle of innovation

SOLUTIONS for piston compressors, electro-compressors and rotary motor-compressors.
With an ample range of models and versions, VMC offers answers designed for every need and avant-garde technological solutions that contribute to the competitive growth of the company.

A high level of professionalism, efficiency, the ability to listen to their clients and give them concrete answers for every need. VMC is synonymous with quality and evolved service in the realization of valves and screws for compressors. With a vast experience over more than twenty years, thanks to a strong problem-solving operative philosophy, VMC has seen the level of research and technological experimentation increase notably in order to arrive at safe and dependable innovative solutions that anticipate the needs of the market. Every single product is born from the basis of careful research, strict controls, elevated quality standards, optimized times and costs, functional solutions. With a specific objective: not only to satisfy the needs of today, but also to anticipate the opportunities and the challenges of tomorrow.

THE CONSTANT SEARCH FOR EXCELLENCE HAS ALWAYS ALLOWED VMC TO TREAD THE ROADS OF INNOVATION AHEAD OF OTHERS.

THE RESULT IS A COMPLETE RANGE OF EFFICIENT, DEPENDABLE, COMPACT AND FUNCTIONAL SOLUTIONS.

Patented concept of the integration between components:

- management of few functional elements
- reduction of obstacles
- better functioning
- easier maintenance
- economic savings

Qualified and timely technical assistance

- > Timely and reliable reports both in the assembly stage and in the succeeding use of every type of valve
- > Complete control of the production process regulated by **System Quality UNI EN ISO-9001:2000**

WE START WITH A MEETING TO DEFINE THE NEEDS. WE STUDY THE MOST ACCEPTABLE SOLUTIONS. WE REALIZE A SOLUTION DESTINED TO SUCCESSFUL PRODUCTION. THIS IS VMC'S PHILOSOPHY OF A **CUSTOMER ORIENTED** APPROACH THAT IS DISTINGUISHED FROM THE FIRST PHASE OF EVERY PROJECT. AN OPERATING STYLE AIMED AT ALWAYS OBTAINING THE BEST SOLUTION IN TERMS OF COSTS, TIME, AND EFFICIENT PRODUCTIVITY.

THE GLOBAL APPROACH TO THE **"COMPRESSOR SYSTEM"** GUIDES THE DESIGN OF VMC SOLUTIONS ON THE BASIS OF SIMPLE, COMPACT AND FUNCTIONAL INTEGRATION BETWEEN THE COMPONENTS. AN ORIGINAL IDEA THAT VMC WAS THE FIRST TO DEVELOP AND TRANSLATE INTO VALVES AND COMPLETELY INNOVATIVE SOLUTIONS: AN OBJECTIVE OF SIMPLICITY THAT DERIVES FROM A COMPLEX RESEARCH INITIATIVE.

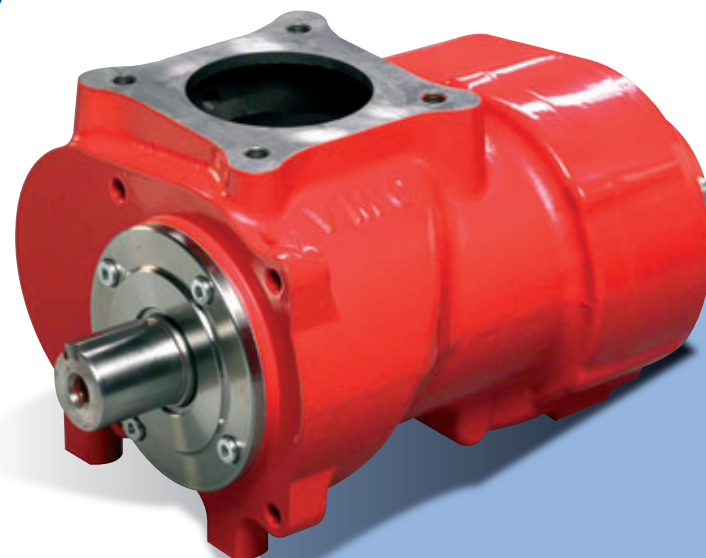

A pre-eminent partnership for brilliant solutions.

VMC proposes itself as a full-fledged business partner for its clients. It does not limit itself to just selling its products, but offers flexible, concrete, safe and timely solutions, realizing valves and screws for every need.

Technical analysis of the project. Specific techniques. Development and engineering evaluation. Benchmarking activities. These are the fundamental points of the VMC planning system. Meticulous methods and considerable collaboration supported by the most evolved operative systems and software. An advanced planning base for giving efficient answers to the production necessities of each client, for staying in line with the most up-to-date dynamics that impose ever shorter "time to market" times. In a market dominated by the imperative that "mistakes are forbidden", VMC fully accepts and recognizes this dictate, convinced that true value is reached not only in the product, but in the innovation that it contains, in the post-sales service, in the total and continuous consultancy.

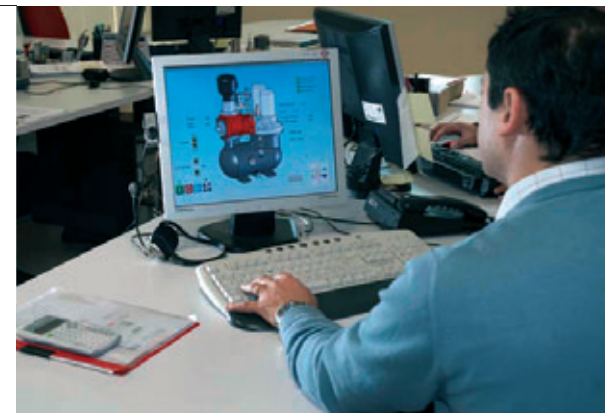

Simple rules for superlative advantages

- > Simplicity
- > Performance
- > Dependability
- > Durability
- > Savings

Simplicity. A value that we test constantly.

VMC solutions are designed and assembled using materials that guarantee total safety for property and persons and superior resistance to oils and corrosion, under the banner of maximum reliability and superior quality services. All VMC products are submitted to constant checks according to production quality parameters and are accurately tested with the help of exclusive and sophisticated machinery. And there is more. Choosing VMC means choosing a company that, as the unchallenged leader in its sector, has understood that the true value for the client is the complete vision of the Machine System. Just compare the totality of the range of VMC valves with major production companies, or discover the numerous patented solutions that are offered. But furnishing the best product, for us, is still not enough. VMC is a team of ever-present experts, in the assembly stage, in experimentation, in use. Ready to guarantee timely support and technical assistance. Ready to give those who work [with their products] the guarantee that they need: tested and monitored valves, whose superior functions are guaranteed over the years.

Analysing the problems. Designing the solution. Realizing the product.

VMC is the main referral for every need relative to valves and screws. Its products are born from a standard that is adaptable to satisfying every need, from the most simple to the most complex.

Specialization as continuity.

The maximum technological standing, the best functional service, research for the highest quality production parameters are guaranteed by the specialization and the great experience constructed in the field, by those, who for many years have measured themselves daily against the typical problems of using valves for compressors and who know the optimal solutions. To transmit this knowledge, VMC has created a modern and functional structure dedicated to internal formation activity, an indispensable instrument for the growth of their own resources and an added service for their clients. A special place dedicated to the knowledge of VMC products, to verify the functions and applications, to verify that the solutions respond to their own needs and the flexibility of the available range. An exclusive service, going beyond the presentation of products and allowing a close encounter with their real potential.

The reasons behind the choice.

We think of our clients, how to better their performance with everything that is needed to raise their competitiveness. We think big, planning with avant-garde systems, realizing every component with the strictest precision, presiding over every production cycle and testing all the finished products. We cut no corners. In fact we want to guarantee a valuable, functional and lasting product with a real and true DNA that will accompany it for its whole life. Even this is an efficient way of staying close to our customers wherever they are.

VMC is present in the principle commercial markets of the world with structures that guarantee consultancy, information, technical support, speed and capillarity delivery, and every type of assistance intervention. It is able to distribute its products in every latitude, both directly and through their branches and agencies. In a market without borders, where the quality of the service makes the difference, VMC assures all its clients a definite point of reference and a personalized answer, without the obstacles of distance or communication. For a competitiveness without borders.

- > Constant research activity to anticipate the solutions for the future
- > Avant-garde technology
- > Flexible solutions
- > Excellent service
- > Maximum safety and strict testing and controls
- > Constant and careful assistance
- > Capillary presence worldwide
